

Nordic Seismology Seminar 2020 and more – first circular

Dear colleagues,

Nordic Seismology Seminar, September 30 – October 2, 2020:

Please note that this years Nordic Seismology Seminar will be at the GEUS headquarter in Copenhagen SEP 30 to OCT 2, online participation is also possible.

The meeting this year is organized in connection to the Nordic EPOS project, so we encourage presentations related to Nordic EPOS in addition to the old classics, see previous seminars for inspiration at <http://seis.geus.net/nordic-seismology.html>.

Workshop September 28 – 30:

Before the seminar we plan to do a workshop on ‘Advanced Processing of Seismology Data’, in connection with the Nordic EPOS project. We would be pleased to know if you have an interest in participating (online or at the venue) and what type of data you would like to work with. We will prepare different data sets to be analyses with the SEISAN software, on induced seismicity, Arctic applications and for general use. Participants are encouraged to bring their own data.

Training September 29:

Parallel to the workshop, there will be a training session on best practice discussions on 1. Data Management and 2. FAIRness of the infrastructures (with a focus on our region).

Due to COVID-19 we have a limited number of seats available at the venue, it will therefore also be possible to participate online. GEUS has enforces strict hygiene rules at the venue.

Please let us know if you wish to join us here in Copenhagen or online.

I wish you all a nice summer,
Peter
